

## SEASHINE AQUARIUM LIGHTING

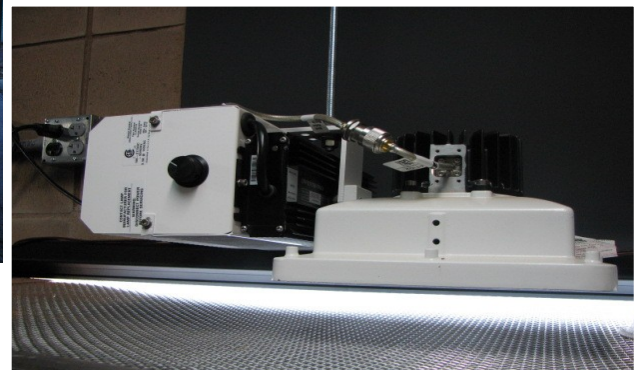

*RTM Lighting and Electronics*

Plasmalyte's Plasma Aquatic Light Fixture is ideally suited for many applications within zoo facilities. The only fixture on the market that provides full-spectrum light output, Plasmalyte's highly energy efficient lighting solution combines the benefits of a high output HID and a UVA/UVB light source all in one compact fixture. This fixture consumes 40% less energy, emits significantly less heat, and boasts a 50,000 hour

*Plasmalyte-Seashine is a 300 watt, full-spectrum, single entity plasma emitting fixture. Light output includes UV and IR spectrums for healthy plant and animal growth*

rated life. Plasmalyte's patented design can be adjusted to meet a variety of application specific installations and its sealed optics offer a higher level of protection for exhibits compared to traditional open bulb fixtures.
